ГРОДНЕНСКИЙ СТЕКЛОЗАВОД

Открытое акционерное общество

It is a highly mechanized multidisciplinary enterprise for the **development and production of glass products**. Being one of the main manufacturers of **glass containers** in the Republic of Belarus, the plant produces and sells glass containers in three main colors: **green, olive and colorless**. Production is carried out at two production sites: Grodno city and worker's settlement Yelizovo (JSC «Grodno Glass Factory» branch «Elizovo»). The company also produces **rolled patterned and reinforced glass at the production site in Grodno city**.

COMPANY ACHIEVEMENTS

- Rich history and extensive experience, the plant was founded in 1922
- Operates 6 furnaces and 8 production lines at two production sites
- The total production capacity of the plant is 535 tons per day
- Advanced production technologies allow to produce products 20% lighter than the weight of traditional products
- Products meet the level of the best world standards
- The company's product range is more than 200 items

BENEFITS OF COOPERATION

- A wide **range** of products.
- Favorable **geographical location**.
- The possibility of **manufacturing** both **small batches** and large ones.
- Flexibility of the **product** policy.
- Development of **projects** together with the buyer, from the development of an **individual drawing** to the production of the finished product.
- Our glass is **safe** and **certified** according to safety standards.
- Our priorities are the use of the latest **technological achievements** and international **experience**, as well as the introduction of modern **technologies**.
